

## Vehicle Dashboard Icons

1. ABS warning light - it is turned on every time there's something wrong with the Anti-lock Brake System. Note that the ABS symbol is activated once the drive starts the engine but it's automatically turned off after a few seconds.

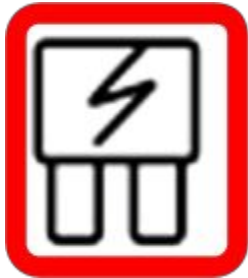

2. Low fuel notification - this panel is switched on if the fuel level gets very low and refuel is required.

3. Seat belt reminder - the symbol appears and remains active as long as the engine is started and the seat belt remains unfastened; depending on the car manufacturer and car model, the seat belt reminder is combined with an audio notification.

4. Electrical problem warning - this light warns you that there's a problem with the electrical system of the car.

5. Brake system alert - the notification is powered on if the ECU detects a problem to the brake system

6. Warning light - it signals an unidentified problem with your car; it usually requires the car to be serviced.

7. Child seat indicator - if turned on, it informs you that the standardized child safety seat is attached

8. Tire pressure monitor - the warning is turned on in case of low tire pressure which could raise the fuel consumption or affect the grip.

9. Air filter - usually installed on the center console but also found on the dashboard, this light informs the driver that a malfunction was detected at the passenger compartment air filter

10. Front airbag - the light monitors the front airbag and, in case it is turned on, signals a problem with it; it usually requires professional assistance.

11. Side airbag - same as the front airbag but intended for the side airbag

12. Child seat - this symbol informs the driver that there may be a problem with the rear-mounted child seat; similar to number 7 but used by different manufacturers

13. Fog beams indicator - it is activated and remains on once the driver turns on the fog beams

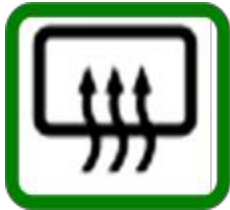

14. Windshield wash - the notification appears once the windshield wipers are activated

15. Master lighting switch

16. Rear window defrost - pretty self-explanatory, it is turned on once the driver presses the rear window defrosting button

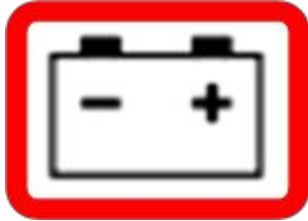

17. Child seat warning - similar to the other child seat notifications, it warns the driver that the child seat may be wrongly installed

18. Brake fluid malfunction - rarely installed on the dashboard, it unveils a problem in the brake fluid recipient

19. Battery warning - if this light is turned on while driving, it reveals a malfunction concerning the battery charging system

20. Child safety lock - if lighted on, the symbol shows you that the child safety lock has been activated

21. Emergency indicator - the notification is activated once the driver pushes the emergency button

22. Cruise control - this light is turned on if the cruise control system is activated; note that it may differ by brand and car model.

23. Windshield defrost - similar to rear window defrost but especially intended for windshield

24. Powertrain malfunction - if on, this light shows that the powertrain has been damaged and the car needs to be serviced as soon as possible.
